Theme of the Conference

Business Applications on the Move

According to IDC, in 2010, for the first time the sales by number of mobile computing devices (smartphones and tablets) exceeded the number of personal computer sales. Places that were previously spaces for conversations are now converted to workplaces. Even at scientific conferences it is hard to spot an active worker without a supporting device. This fact has significant implications for business applications. Companies need to acknowledge that employees as well as clients access those applications using mobile devices. What works in a monolithic environment under control of the enterprise may not work in a mobile environment. Therefore, classical topics like business processes or information management has to be rethought.

It is our pleasure to invite you to submit your work to BIS2013 conference. The BIS conference is a well-respected event joining international researchers to discuss the wide range of the development, implementation, application and improvement of business applications and systems. It is addressed to the scientific community, people involved in the development of business computer applications, consultants helping to properly implement computer technology and applications in the industry.

Topics of Interest

BIS 2013 International Conference invites researchers and practitioners to submit papers that contribute the results of research in Business Information Systems as well as papers that report on industrial IT projects. The Program Committee particularly encourages presentations of practical papers on industrial experience or on the validation of prototype implementations. Topics should preferably be related to mobile aspects as defined in the conference theme.

- ontologies
  - creation, learning, population, evolution and evaluation of ontologies
  - ontologies for enterprise content management
  - natural language processing and cognitive science
  - semantic integration of heterogeneous semi-structured information sources
  - interoperability of heterogeneous information systems
  - business models for Web information integration and aggregation
  - linked open data
- contexts
  - location-aware and geography-centric information systems
  - wireless and mobile applications
  - multi-agent distributed systems
- semantic web personalization
- smart cities
- ambient computing
- RFID and localisation techniques
- content retrieval and filtering
  - search over semi-structural Web sources
  - Deep Web search and crawling
  - data integration from Web information sources
  - modelling and describing evolving data sources
  - information gathering support for knowledge-intensive enterprises
  - business models for a content
  - unified data processing and communication systems
  - automatic identification and data collector systems
- collaboration
  - knowledge-based collaboration
  - social networks and social wikis
  - enterprise mashups, Enterprise 2.0
  - security in distributed systems
  - Web-based model for discoverability, consumption, and reuse
  - social networks for healthcare
- services science
  - service oriented computing
  - semantic web services
  - composition, choreography and orchestration
  - trust and quality of service (QoS)
  - service level agreements
  - distributed computing for the smart grid
- interoperability
  - digital ecosystem
  - e-infrastructure
  - cloud computing
- business process management
  - semantic business process management
  - adaptive and dynamic processes
  - supply chain processes
  - ERP implementations
  - integration of data and processes
  - collaborative BPM
- application
  - policy modelling and simulation for e-governance
  - technologies for digital culture and cultural heritage
  - digital libraries and web archiving
  - access to cultural resources
  - technologies for a low carbon economy
  - safety and healthcare record information reuse
  - early warning systems and mobile monitoring
  - intelligent medical systems
  - business models for Future Internet

Submission

Proceedings of BIS since 2008 are published in Lecture Notes in Business Information Processing by Springer. We plan to publish BIS 2013 proceedings again by Springer. Submission guidelines will be published at:

http://bis.kie.ue.poznan.pl/16th_bis/submission.php

Important Dates

- Jan 22, 2013 submission deadline for papers
- Mar 1, 2013 notification of acceptance/rejection
- Mar 15, 2013 submission of final papers
- Jun 19 - 21, 2013 the conference

General Chair

Witold Abramowicz, Poznań University of Economics, Poland, (Witold@Abramowicz.pl)

Program Committee

Dimitris Apostolou, University of Piraeus, Greece
Christian Bizer, Freie Universität Berlin, Germany
Michelangelo Ceci, Universita degli Studi di Bari, Italy
Wojciech Cellary, Poznań University of Economics, Poland
Dickson K.W. Chiu, Dickson Computer Systems, Hongkong
Oscar Corcho, Universidad Politecnica de Madrid, Spain
Tommaso Di Noia, Politecnico di Bari, Italy
Ciprian Dobre, University Politehnica of Bucharest, Romania
Schahram Dastdari, Technical University of Vienna, Austria
Suzanne Embury, University of Manchester, UK
Vadim Ermolayev, Zaporozhye National University, Ukraine
Agata Filipowska, Poznań University of Economics, Poland
Bogdan Franczyk, University of Leipzig, Germany
Flavius Frasincar, Erasmus University Rotterdam, Netherlands
Johann-Christoph Freytag, Humboldt Universität zu Berlin, Germany
Marko Grobelnik, Jožef Stefan Institute, Slovenia
Norbert Gronau, University of Potsdam, Germany
Volker Gruhn, Universität Duisburg-Essen, Germany
Francesco Guerra, University of Modena, Italy
Jon Atle Gulla, Norwegian University of Science and Technology, Norway
Hele-Mai Haav, Tallinn University of Technology, Estonia
Manfred Hauswirth, National University of Ireland, Ireland
Martin Hepp, Bundeswehr University Munich, Germany
Knut Hinkelmann, University of Applied Sciences Northwestern Switzerland, Switzerland
Marta Indulska, The University of Queensland, Australia
Marian Janssen, Delft University of Technology, Netherlands
Adam Jatowt, Kyoto University, Japan
Organizing Committee
Poznań University of Economics, Poland
Elżbieta Bukowska (Chair)
Barbara Golebiowska
Wlodzimierz Lewoniewski
Szymon Lazaruk
Bartosz Perkowski
Wioletta Sokolska
Milena Stróżyńska
Krzysztof Węcel

Important Addresses
Please find e-mail and web links for all important information at:
http://bis.kie.ue.poznan.pl

Poznań University of Economics
Department of Information Systems
Al. Niepodległości 10
61-875 Poznań, Poland
phone: +48 (61) 854 33 81, fax: +48 (61) 854 36 33
bis@kie.ue.poznan.pl

Robert Tolksdorf, Freie Universität Berlin, Germany
Hema Viktor, University of Ottawa, Canada
Krzysztof Wecel, Poznań University of Economics, Poland
Mathias Weske, University of Potsdam, Germany
Anna Wingkvist, Linnaeus University, Sweden
Andreas Wombacher, University of Twente, Netherlands
Qi Yu, Rochester Institute of Technology, USA
Sławomir Zarożny, Polish Academy of Sciences, Poland
John Zéleznikow, Victoria University, Australia
Jozef Zurada, University of Louisville, USA

16th International Conference on Business Information Systems

BIS 2013
Poznań, Poland
19 – 21 June, 2013

http://bis.kie.ue.poznan.pl

Proceedings will be published by Springer in LNBIP series

Submission deadline: January 22, 2013
